The announcer told me and the other racer to get started, and we are off. The other racer was sitting around and relaxing, what I started the race, but I didn't get tired. The other racer was still sitting around and not catching up to me. My friends were so glad that I was still in the lead for slow and steady, but the other racer had got ahead of me and I'm doing my best to win. The other racer was called the robot speeder. Then the robot speeder had to go out and it was very tired, so it decided to rest a while, and I walked very quietly and passed him without waking him up. And I got back in the lead, and my friends cheered for me to reach the finish line. And when the robot speeder woke up from his rest, he saw me get close to the finish line, so he revved up his engine and raced after me. The robot speeder tried to catch me, but the robot speeder was too late. I have won the race. Amy Rose gives me a kiss, slow and steady wins the race.
